- **Research Coordination Networks**: aim to bring together scientists to pursue a common goal.
- Objectives of G2P Network :
 - Grow the community of G2P scientists.
 - Identify and coordinate resources for G2P analyses.
 - Provide means to train scientists in the use of these resources.
 - Provide resources for K-12 education and public outreach.

Genome2Phenome Meeting

Summer 2016 Tentative Agenda

- Transcriptome Analysis
 - articulation of standards for data collection and analysis.
 - transcriptome analysis in absence of a genome (data collection through annotation)
 - developing working group collaborations that result in grant proposals to support bioinformatic analysis of transcriptome data
